github.com/Ducbii4202 • linkedin.com/in/thanh-nguyen0402

Business Analyst with nearly 2 years of hands-on experience, including 1.5 years embedded in a high-velocity startup environment at FI.AI — where lean teams and fast-moving product cycles demanded full ownership of the requirement lifecycle in place of formal documentation frameworks. Contributed end-to-end to a multi-platform restaurant management system integrating blockchain payments and AI-powered loyalty features across four distinct user platforms. Holds a Software Engineering degree from FPT University, enabling deep technical collaboration with developers on architecture, APIs, and data flows. Proven ability to translate ambiguous business needs into clear, actionable specifications in Agile environments — bridging stakeholders, product, and engineering with speed and precision

SKILLS

BUSINESS ANALYSIS: Requirement Gathering · BPMN · BRD / SRS · User Stories · Use Cases · UAT · Backlog Management · Stakeholder Communication

PRODUCT & UX DESIGN: Wireframing · User Flow Design · Figma · Draw.io · Visual Paradigm

TOOLS: Jira · Trello · Notion · Postman · Swagger · Git · Docker

DATA & DATABASE: MySQL · SQL Server · MongoDB · Power BI · Microsoft Excel

PROGRAMMING: JavaScript · TypeScript · React.js · Python

TECH KNOWLEDGE: Blockchain & Smart Contracts · AI-based Features · Face Recognition · IoT Systems · OOP · Agile / Scrum

DOMAIN EXPERTISE: F&B / Restaurant Systems · Loyalty & Reward Platforms · Blockchain Payment · WMS · Recruitment SaaS

SOFT SKILLS: Business Communication · Critical Thinking · Problem Solving · Teamwork · Adaptability

WORK EXPERIENCE

Business Analyst FI.AI Co., Ltd. – Vietnam	Nov 2024 - Present District 2
- Owned the full requirement lifecycle — from discovery to UAT — in a lean startup with no formal documentation structure, designing processes and templates from scratch to support a 4-platform product (Web Admin, Merchant, Staff, Customer). - Elicited and documented 30+ functional requirements from 6+ cross-functional stakeholders spanning restaurant operations, loyalty programs, and service automation; translated findings directly into developer-ready user stories and acceptance criteria. - Defined end-to-end functional requirements for a blockchain-based digital wallet supporting asset management, reward distribution, and smart contract automation — bridging fintech and F&B; domains. - Designed RBAC (Role-Based Access Control) model across 4 user roles, strengthening system security and reducing access-related escalations during QA. - Created system workflows, user journeys, and wireframes in Figma for web and mobile applications, aligning UX decisions with business logic before development handoff. - Collaborated with engineering and product teams in sprint planning, backlog refinement, and acceptance criteria definition — accelerating sprint delivery cycles. - Facilitated UAT sessions and delivered product demos to stakeholders at each deployment milestone, ensuring alignment between business expectations and delivered features	
Business Analyst Intern (Product Team) AmazingTech Company	Jan 2024 - Apr 2024 District Tan Phu
- Analyzed requirements with Product Manager and stakeholders for a SaaS-based recruitment platform supporting enterprise intern management. - Produced SRS documentation, business process diagrams (BPMN), and use case documents using Draw.io and Visual Paradigm. - Wrote user stories and maintained the product backlog; participated in Agile ceremonies including sprint planning and daily stand-ups. - Reviewed product wireframes with UI/UX designers to improve usability and alignment with business needs. - Assisted in API mapping and data flow clarification, reducing misunderstandings during development handoff. - Worked within a 4-member cross-functional Agile team, bridging communication between stakeholders and developers.	
Property Consultant SoFo Home Company	Mar 2021 - Dec 2023 District 9
- Analyzed client requirements and financial constraints to recommend suitable property investment options. - Built and maintained strong client relationships contributing to a 20% increase in repeat customers. - Provided market insights and investment analysis supporting client decision-making. - Managed end-to-end consultation process from requirement identification to transaction completion.	

PROJECTS

Enterprise Graduation Project – Agricultural Supply Management 	Jan 2025 - Jun 2025
Role: Business Analyst + Front-End Support	
- Led requirement gathering and defined 12+ user stories for Sales, Warehouse, Agent, and Admin modules aligned with real-world agricultural workflows. - Designed system workflows and ERD diagrams to support module-level development planning. - Managed product backlog and sprint progress tracking using Jira. - Built KPI dashboards in Excel, reducing stakeholder reporting time by 25%.	

Role: *Business Analyst*

- ▶ Gathered and analyzed user requirements for AI-based attendance tracking and role management features.
- ▶ Developed SRS documentation and API mapping, reducing development rework by an estimated 15%.

EDUCATION

Bachelor of Software Engineering

FPT University

Nov 2020 - Jun 2025

LANGUAGES

English: IELTS 5.5 • Chinese: HSK 3
