Business Analyst with a Software Engineering background and experience delivering SaaS and multi-platform products including blockchain wallet, restaurant management systems, and AI-based solutions. Skilled in requirement engineering, BPMN modeling, and translating business needs into scalable product features within Agile environments.

SKILLS

- BUSINESS ANALYSIS:** Requirement Gathering • BPMN • BRD / SRS • User Stories • Use Cases • UAT • Stakeholder Communication • Backlog Management
- PRODUCT & UX DESIGN:** Wireframing • User Flow Design • Figma • Draw.io • Visual Paradigm
- TOOLS:** Jira • Trello • Notion • Postman • Swagger • Git • Docker
- DATA & DATABASE:** MySQL • SQL Server • MongoDB • Power BI • Microsoft Excel
- PROGRAMMING:** JavaScript • TypeScript • React.js • Python
- TECHNICAL & DEVELOPMENT KNOWLEDGE:** Blockchain Systems • Smart Contract Integration • IoT Systems • AI-based System Features • Face Recognition Systems • Object-Oriented Programming (OOP) • Agile / Scrum Development
- DOMAIN EXPERTISE:** F&B Restaurant Management Systems • Loyalty & Reward Platforms • Blockchain Payment Systems • Warehouse Management Systems (WMS) • Service Robot Operations
- SOFT SKILLS:** Business Communication • Critical Thinking • Problem Solving • Teamwork • Adaptability

WORK EXPERIENCE

- Business Analyst**
FI.AI Co., Ltd. – Vietnam

Mar 2025 - Present
Da Kao Ward, District 1, Ho Chi Minh City.

 - Led requirement analysis for a multi-platform restaurant management system, improving operational efficiency across 4 user platforms (Web Admin, Merchant, Staff, Customer)
 - Gathered and analyzed requirements from 6+ stakeholders, defining 30+ functional requirements for restaurant operations, loyalty programs, and service automation.
 - Delivered comprehensive BRD, user stories, and use cases, reducing requirement ambiguity and accelerating development cycles
 - Designed system workflows, user journeys and wireframes using Figma for web and mobile applications.
 - Designed and implemented RBAC system for 4 user roles, enhancing system security and access control efficiency
 - Defined functional requirements for a blockchain-based wallet system supporting digital asset management and automated reward distribution via smart contracts.
 - Collaborated with developers and product managers to refine backlog items and clarify requirements during sprint planning.
 - Conducted User Acceptance Testing (UAT) and presented product demos to stakeholders prior to deployment.
- Business Analyst Intern (Product Team)**
AmazingTech Company

Jan 2024 - Apr 2024
District Tan Phu

 - Conducted requirement analysis with Product Manager and stakeholders for a SaaS-based recruitment platform supporting enterprise intern management.
 - Produced Software Requirement Specification (SRS), business process diagrams and use case documentation using Draw.io and Visual Paradigm.
 - Wrote user stories and maintained product backlog while participating in Agile ceremonies including sprint planning and daily stand-ups.
 - Collaborated with UI/UX designers to review product wireframes and improve usability.
 - Assisted in API mapping and data flow clarification, reducing requirement misunderstandings during development.
 - Worked in a cross-functional Agile team of 4 members supporting communication between stakeholders and developers.
- Property Consultant**
SoFo Home Company

Mar 2021 - Dec 2023
District 9

 - Analyzed client requirements and financial constraints to recommend suitable property investment options.
 - Built and maintained strong client relationships contributing to a 20% increase in repeat customers.
 - Provided market insights and investment analysis supporting client decision-making.
 - Managed end-to-end consultation process from requirement identification to transaction completion.

PROJECTS

- Enterprise Graduation Project – Agricultural Supply Management**

Jan 2025 - Jun 2025

Role: **Business Analyst + Front-End Support**

 - Led requirement gathering and defined **12+ user stories**, aligning system features with real-world agricultural supply workflows
 - Designed **system workflows and ERD diagrams** for Sales, Warehouse, Agent, and Admin modules.
 - Managed backlog and sprint progress using Jira.
 - Built KPI dashboards in Excel reducing reporting time by **25%**.
- Graduation Project – Human Detection and Face ID System**

Oct 2024 - Dec 2024

Role: **Business Analyst**

 - Analyzed user requirements for attendance and role management.
 - Developed **SRS documentation and API mapping** reducing development rework by **15%**.

EDUCATION

Bachelor of Software Engineering	Nov 2020 - Jun 2025
FPT University
